Step forward skidding system (x and y axis)

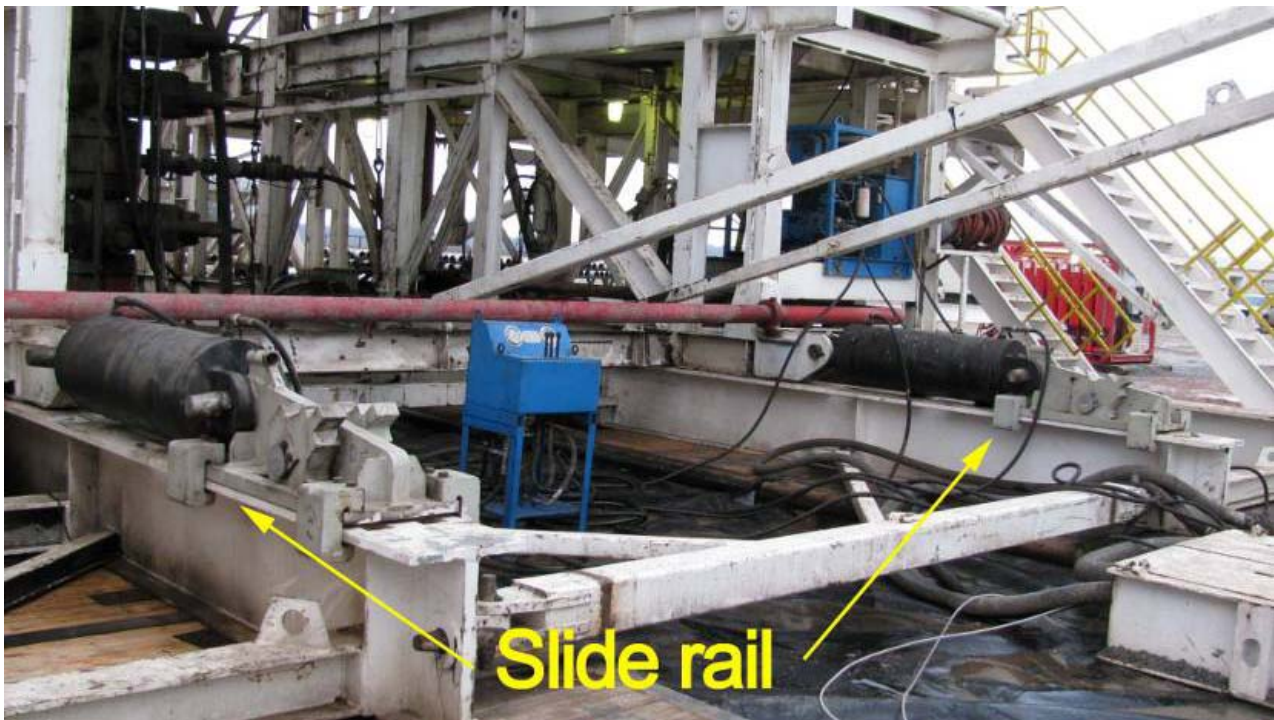

Main features:

- Adopt four points supporting mode, compared with continuous rail skidding type, with high flexibility and less requirements for rig base flatness and bearing capacity.
- With the characters of simple structure and easy operation, this device can realize the parallel and transversal skidding of drilling rigs. And it can also be used on many kinds of substructures.
- It can be equipped with specially-designed substructure to realize the smooth moving of the drilling rig from wellhead after Christmas tree installation.
- According to user's requirements, we can customize the extended cable tray, high pressure mud manifold and specially-designed mud tank pipeline for skidding cluster well operation.
- Capable to be equipped on new rigs. The upgrading or rebuilding services are available for user's existing rigs.

Slide rail forward skidding system (x axis)

Scope of supply:

- skidding rail (the length is accordant with the substructure)
- skidding cylinder 2 sets
- hydraulic pipeline, skidding operation panel.

Railway skidding system (x axis)

Scope of supply:

- skidding rail (length for 80-100m, Qty of rail is between 18-20pcs)
- skidding support 4 sets
- equipment supports 10-12 sets
- jacking cylinder 8 sets
- skidding cylinder 2 sets
- hydraulic pipeline, skidding operation panel.
